EDUCATION

MIT World Peace University (MIT-WPU) *Pune, India*
Bachelor of Science in Computer Science, Cloud Computing Specialisation *Expected 2027*

PROJECTS

GENOID – AI Virtual Companion GitHub *Electron, React, Gemini API, JavaScript*

- Built an AI-powered desktop application integrating an LLM API with an interactive user interface.
- Connected conversational AI features to desktop functionality via an API proxy and inter-process communication.
- Implemented local JSON-based storage for conversation memory and personality settings.
- Added interactive 3D interface components for a more engaging, personalised AI experience.

LifeOS – Productivity and Personal Management GitHub *Node.js, JavaScript, SQLite, REST APIs*

- Developed a modular platform for personal planning, budgeting, goal management and progress tracking.
- Implemented backend routes and database persistence to support application workflows and user data.
- Connected frontend components to backend services; resolved database connectivity and authentication issues.

ControlFree – Computer Vision-Based Interaction System *Python, OpenCV, MediaPipe, PyAutoGUI*

- Developed a touchless computer interaction system using computer vision and hand-gesture recognition.
- Integrated hand tracking with desktop automation to enable hands-free control.
- Applied filtering and smoothing to improve tracking stability and interaction consistency.

SKILLS & INTERESTS

Programming: Python, JavaScript, SQL
Generative AI: Gemini API, LLM integration, conversational interfaces
Development: React, Node.js, Electron, REST APIs, OpenCV, MediaPipe
Databases & Tools: SQLite, Git, GitHub
Interests: Agentic AI applications, AI product development, LLM-powered workflows, rapid prototyping
